

## Cover Page for the Data Analysis Plan

<b>Official Title:</b>	Mobile health (mHealth) application called CBCT Sessions to Treat and Reduce Elevated Stress among Students (C-STRESS)
<b>NCT Number:</b>	NCT05776901
<b>Document Type:</b>	Data Analysis Plan
<b>Document Date:</b>	08/09/2023

**C-STRESS Statistical Analysis Plan**

The primary outcome will be C-STRESS's usability as reflected in usability scores and measured by the System Usability Scale (SUS). Descriptive statistics (i.e., mean and standard deviation) of the usability scores of the C-STRESS platform at the baseline, week 3, and week 6 will be computed. Two-sided, paired-sample t-tests will be used to evaluate the change in mean SUS scores from baseline at week 3 and week 6.
