CONSENT FORM

Study Title: Are baseline factors associated with persistent pain in people with Femoral Acetabular Impingement Syndrome after a physiotherapy-led rehabilitation programme?

Name of Researcher:

If you agree, please initial box

1. I confirm that I have read the information sheet dated..... (version.....) for this study. I have had the opportunity to consider the information, ask questions, and have these answered satisfactorily.	
2. I understand that my participation is voluntary and that I am free to withdraw at any time without giving any reason, without my medical care or legal rights being affected.	
3. I understand that relevant sections of my medical notes and data collected during the study may be looked at by individuals from University of Oxford, from regulatory authorities and participating hospital trust where it is relevant to my taking part in this research. I give permission for these individuals to have access to my records.	
4. I understand that appropriate members of the research group will have access to my scans. If a concern is raised about a possible abnormality on my scan, I will only be informed if a doctor thinks it is medically important such that the finding has clear implications for my current or future health.	
5. I agree to take part in this study.
