

Unique Protocol ID: No.2024018

**Official Title: Transcranial electrical stimulation combined with
interim testing promotes temporal memory in patients with
schizophrenia**

Document Title: Informed Consent

Date of the Document: 2024/07/15

Informed Consent

Clinical Research Program: Transcranial electrical stimulation combined with interim testing promotes temporal memory in patients with schizophrenia

Project Organizer: Northwest Normal University

Project Collaborators: The Third People's Hospital of Lanzhou

Statement of Consent

Dear Patient:

You are cordially invited to participate in a study on memory. The study protocol has been reviewed and approved by the Ethics Committee of Northwest Normal University and the Third People's Hospital of Lanzhou City for the study.

By signing this protocol, you agree to the following:

- I have read and understood the protocol in its entirety.
- The experimenter has answered any questions I may have about this experiment.
- I can ask to stop the experiment at any time if I feel any discomfort during the experiment.
- I have been informed that all experimental content will be kept confidential and will not be made public in any way that identifies an individual, unless required by law.

Finally, I have voluntarily decided to participate in this study.
