The GENMOD Procedure

PROC GENMOD is modeling the probability that aval='0'. One way to change this to model the probability that aval='1' is to specify the DESCENDING option in the PROC statement.

Response Profile

Ordered Value	aval	Total Frequency
1	0	69
2	1	908

Subjects achieving postprandial glucose targets 26 weeks after randomisation - statistical analysis - in-trial - full analysis set

Parameter Code=PPG7870 Parameter=PPG ≤ 7.8 mmol/L and HbA1c $< 7.0\%$ without severe hypo and with minimal weight gain

The GENMOD Procedure

PROC GENMOD is modeling the probability that avar='0'. One way to change this to model the probability that avar='1' is to specify the DESCENDING option in the PROC statement.

Subjects achieving postprandial glucose targets 26 weeks after randomisation - statistical analysis - in-trial - full analysis set

Parameter Code=PPG78W Parameter=PPG <=7.8 mmol/L (SMPG) without severe hypoglycaemic episodes Study Identifier=NN1218-4131

The GENMOD Procedure

PROC GENMOD is modeling the probability that aval='0'. One way to change this to model the probability that aval='1' is to specify the DESCENDING option in the PROC statement.

REGION1	4	ASIA (EXCLUDING JAPAN) EUROPE JAPAN NORTH AMERICA
BOLAD1	2	BOLUS INSULIN ALGORITHM (SLIDING SCALE) CARBOHYDRATE COUNTING (FLEXIBLE) BOLUS INSULIN THERAPY

Response Profile

Ordered Value	aval	Total Frequency
1	0	226
2	1	751

Subjects achieving postprandial glucose targets 26 weeks after randomisation - statistical analysis - on-treatment - full analysis set

Parameter Code=PPG78 Parameter=PPG <=7.8 mmol/L (SMPG) Study Identifier=NN1218-4131

The GENMOD Procedure

PROC GENMOD is modeling the probability that aval='0'. One way to change this to model the probability that aval='1' is to specify the DESCENDING option in the PROC statement.

Parameter Information

Final
3358 of 4425

Novo Nordisk

Subjects achieving postprandial glucose targets 26 weeks after randomisation - statistical analysis - on-treatment - full analysis set

Parameter Code=PPG7870 Parameter=PPG ≤ 7.8 mmol/L and HbA1c $< 7.0\%$ without severe hypo and with minimal weight gain

The GENMOD Procedure

PROC GENMOD is modeling the probability that avar='0'. One way to change this to model the probability that avar='1' is to specify the DESCENDING option in the PROC statement.

Parameter Information

Parameter Code=PPG78W Parameter=PPG <=7.8 mmol/L (SMPG) without severe hypoglycaemic episodes Study Identifier=NN1218-4131

The GENMOD Procedure

PROC GENMOD is modeling the probability that aval='0'. One way to change this to model the probability that aval='1' is to specify the DESCENDING option in the PROC statement.
