Consent to Participate in Research

Anise Health: Digital Mental Health for Asian Americans clinicians (control group)

Key Information*

- You are being invited to participate in a research study. Participation in research is completely voluntary.
- If you agree to be in this study, the procedure involves providing mental health services to your clients for 12 weeks. You are also consenting for us to use your clinical data for research purposes.
- You are also consenting for us to use your clinical data for research purposes.
- Risks and/or discomforts may include some of the questions that cause you to experience negative thoughts when reflecting on your experiences.
- There is no direct benefit to you, but may benefit the society and researchers to gain a better understanding of how to improve the mental health services for Asian Americans.

Introduction and Purpose

My name is Brian Keum, Ph.D. I am a faculty member at the University of California, Berkeley in the School of Public Health. Anise Health Inc. and I would like to invite you to take part in my research study, which looks at improving the tools available for clinicians when working with clients. The aims are to improve the digital tools available to the clinicians on Anise Health when working with Asian American clients who experience bicultural stress, and racial trauma.

Procedures

If you agree to be in this study, the procedure involves providing mental health services to your clients. You are also consenting for us to use your clinical data for research purposes.

Some sample questions of clinical data we will collect:
I feel a strong attachment to my ethnic group
I found it hard to wind down
I found myself getting agitated

Benefits

There are no anticipated significant benefits, but it may benefit society and researchers to gain a better understanding of how to improve the mental health services for Asian Americans.

Risks/Discomforts

There are no anticipated significant risks or benefits for completing this study. However, some of the questions might cause you to experience negative thoughts when reflecting on your experiences. The sessions may prompt you to discuss your racial trauma and cultural experiences that may evoke

difficult feelings or memories from the past. You have the option to not answer or skip questions if you are feeling distressed, or entirely stop the study if you do not wish to continue.

As with all research, there is a chance that confidentiality could be compromised; however, we are taking precautions to minimize this risk.

Confidentiality
Your study data will be handled as confidentially as possible. If the results of this study are published or presented, individual names and other personally identifiable information will not be used.

The researchers will do their best to make sure that your private information is kept confidential. Information about you will be handled as confidentially as possible, but participating in research may involve a loss of privacy and the potential for a breach in confidentiality. Study data will be physically and electronically secured. As with any use of electronic means to store data, there is a risk of breach of data security.

This research is covered by a Certificate of Confidentiality from the National Institutes of Health. The researchers with this Certificate may not disclose or use information or documents that may identify you in any federal, state, or local civil, criminal, administrative, legislative, or other action, suit, or proceeding, or be used as evidence, for example, if there is a court subpoena, unless you have consented for this use. Information, documents, or biospecimens protected by this Certificate cannot be disclosed to anyone else who is not connected with the research except, if there is a federal, state, or local law that requires disclosure (such as to report child abuse or communicable diseases but not for federal, state, or local civil, criminal, administrative, legislative, or other proceedings, see below); if you have consented to the disclosure, including for your medical treatment; or if it used for other scientific research, as allowed by federal regulations protecting research subjects.

Your personal information may be released if required by law. Authorized representatives from the following organizations may review your research data for purposes such as monitoring or managing the conduct of this study:
- National Institutes of Health
- University of California

Identifiers will be removed from the identifiable private information. After such removal, the information could be used for future research studies or distributed to other investigators for future research studies without additional informed consent from the subject or the legally authorized representative. Information may be maintained indefinitely for the researcher's records.

Compensation
For your participation, you will be compensated with a $50 gift card.

Rights
Participation in research is completely voluntary. You are free to decline to take part in the project. You can decline to answer any questions and are free to stop taking part in the project at any time. Whether or not you choose to participate in the research and whether or not you choose to answer any questions or continue participating in the project, there will be no penalty to you or loss of benefits to which you are otherwise entitled.

Commercialization of Research Findings
The objectives of this research are aimed at developing and evaluating the benefits of digital tools that clinicians would use with their clients. If the digital tools are demonstrated to improve care, it is

possible that the results of this research may be associated with future commercialization of the tools by Anise Health.

Research Funding and Conflict of Interest
UC Berkeley and Anise Health are receiving a grant from the National Institute of Mental Health to support this research.

Both Dr. Brian Keum and Ms. Alice Zhang, who are Co-Principal Investigators on the study team, have a financial interest in Anise Health, the company paying for this study. Dr. Keum is a clinical advisor to Anise Health and owns stock in Anise Health. Ms. Alice Zhang, is the Co-Founder of Anise Health.

Questions
If you have any questions about this research, please feel free to contact me at briankeum@berkeley.edu. You may also contact Alice Zhang at Anise Health Inc. (alice@anisehealth.co)

If you have any questions about your rights or treatment as a research participant in this study, please contact the University of California at Berkeley's Committee for Protection of Human Subjects at 510-642-7461, or e-mail subjects@berkeley.edu.
