

COVER PAGE

Title of document: Randomized Controlled Study of Intraincisional Infiltration Versus Intraperitoneal Instillation of Standardized Dose of Ropivacaine 0.2% in Post-Laparoscopic Cholecystectomy Pain

NCT Number – Not Available

Document Date – 01/04/2014

Informed Consent for Participation in Study

I agree to get myself/my patient to undergo laparoscopic cholecystectomy under GA at Jawaharlal Nehru Medical College, Aligarh Muslim University, Aligarh. The effect and nature of operation and anaesthesia and associated risks have been explained to me. I give consent about the possible use of ropivacaine in my operation and fully understand that this is being done in good faith and side-effects, if any, associated with its use, is part of treatment.
