

INFORMED CONSENT FORM – FATHER

Title: Effect of Enhanced Recovery After Cesarean (ERAS) Protocol on Mother–Infant and Father–Infant Bonding: A Multicenter Randomized Controlled Trial

Protocol Code: ERAS-CS-BOND-1

Principal Investigator: Dr. Gökçenur Karakelleoğlu

Institution: Istanbul Okan University Hospital

Country: Türkiye

Version: 1.0

Date: November 04, 2025

NCT Number: Not yet Assigned

INFORMED CONSENT FORM – FATHER

Study Title: Effect of ERAS Protocol on Father–Infant Bonding

Principal Investigator: Dr. Gökçenur Karakelleoğlu

1. Purpose

To evaluate the effect of ERAS on father–infant bonding during the first postpartum week.

2. Procedure

On postpartum day 7, you will complete the PBQ questionnaire (10 minutes). No medical procedure is involved.

3. Risks/Discomfort

No physical risks. Emotional discomfort may occur; you may stop at any time.

4. Benefits

No direct clinical benefit; results may help improve family-centered postpartum care.

5. Confidentiality

Data coded, stored for 15 years, no names in publications.

6. Voluntary Participation

You may withdraw without any consequences.

7. Contact

Dr. Gökçenur Karakelleoğlu

Consent Statement

“I have read this form and voluntarily agree to participate.”
