Study Identification

Study Title:

The Effect of Digital Game-Based Learning on Knowledge Level and Attitudes in Preeclampsia-Eclampsia Education of Midwifery Students: Comparison with Simulation and Traditional Education

Date: 03/04/2026

Protocol ID:

E-10840098-202.3.02-1266

Introduction

You are invited to participate in a research study aimed at evaluating the effectiveness of different educational methods used in preeclampsia-eclampsia education for midwifery students. This study is registered on ClinicalTrials.gov.

Study Objective

The objective of this research is to comparatively evaluate the effects of digital game-based learning, simulation-based training, and traditional training on the knowledge level and attitudes of midwifery students.

Study Procedures

If you agree to participate, you will be assigned to one of three groups using purposive sampling. A pre-test will be administered before training, and a post-test will be administered after training.

Voluntary Participation:

Participation is voluntary. You can withdraw at any time without any adverse consequences.

Risks and Benefits

No significant risks are expected. Participation can improve your knowledge and clinical skills.

Privacy

All data will be kept confidential and used only for scientific purposes.
