

**Evaluation of the efficacy of contrast enhanced ultrasound compared to MRI  
for differentiation of hepatic lesions**

**NCT03652636**

**August 20, 2019**

Sensitivity, specificity, ROC / AUC values were calculated using SPSS software (version 28, IBM). Separate analyses of sensitivity, specificity, ROC / AUC were performed focusing on all lesions, lesions 2 cm in size or greater, and lesions 3 cm in size or greater.
