

Official Title: Evaluation of the Effectiveness of Elastic Chains versus Elastics in Maxillary Canine Retraction: A Randomized Clinical Trial

NCT Number:

Document Date: January, 2024

Study Document Type: [Protocol + Informed Consent Form]

Prepared by: **Asraa Haleem Mohamed Tah, MSc Student**

Supervised by:

1. **Reema Aqeel Al-Eryani**, Assistant professor, Faculty of Dentistry- Sana'a University
2. **Ghamdan Abdullah Al-Harazi**, Professor of Orthodontics, Faculty of Dentistry - Sana'a University

Note on Registration Timing:

This study was initiated on 30-1-2024. Initially, I was not aware of the importance of early registration on ClinicalTrials.gov. Registration was completed after the study began to ensure transparency and adherence to ethical guidelines. All study procedures and protocols have been conducted under the supervision of the academic advisor.

Orthodontics Program

Consent Form

I'm agree to participate in this research named

Evaluation of the Effectiveness of Elastic chains Versus Elastics on Maxillary Canine Retraction: A Randomized Clinical Trial

I know that I will be one of the volunteers who will be studied. I also know that x-rays and study models will be taken prior and after teeth retraction.

Being a volunteer or refusal to participate in this study will have no effected from any person.

The risk associated with being volunteer is absent. Data and information I give will be confidential and used only for medical research purpose.

I understand that my name will not be used as in any scientific publication and that my privacy will be strictly maintained. I may withdraw from this study at any time.
