## Comparison of Bone Marrow Aspiration from the Posterior Superior Iliac Spine and Deep Humeral Harvest in Patients Undergoing Rotator Cuff Repair

### **INTRODUCTION:**

In order to decide whether you wish to participate in this research study, you should understand why the study is being done, how the study will be run, the types of study procedures involved, your time commitments, and the possible risks and/or benefits to make an informed decision. This process is known as “informed consent.”

This written consent form provides detailed information about the research study. This consent form may contain words that you do not understand. Please ask the study doctor or the study staff to explain any words or information that you do not clearly understand. Before you decide to take part in this study, you may want to think about it more, or discuss it with family or friends. You can take a copy of this form home with you before making your decision. Your participation in this study is voluntary. You should not join this research study until all of your questions are answered to your satisfaction.

If you wish to participate in this research study, you will be asked to sign this consent form. You will be asked to sign before any study procedures are done. You will be given a copy of this consent form to keep for your records.

### **PURPOSE OF THE RESEARCH STUDY:**

You are being asked to participate in research being conducted by the Andrews Research & Education Foundation (AREF) and Baptist Physicians Group. The purpose of this study is to determine if bone marrow extracted from your hip or your upper arm contains more stem cells. The secondary objective is to determine if operative position influences the quality of the harvested cells.

### **SELECTION OF SUBJECTS:**

The study involves 30 participants undergoing arthroscopic rotator cuff repair surgery. If you are between the ages of 18 and 80 years old and are scheduled to have rotator cuff repair surgery, you can be included in this study. However, if you also require a superior capsular reconstruction, your surgery is a revision rotator cuff repair, or you have diabetes, any immune disorder, rheumatoid arthritis, or a past medical history of metastatic or other cancer which required chemotherapy/radiation therapy, you are not eligible to participate in this study.

### **RESEARCH PROCEDURES:**

If you meet the above criteria, you will have the study explained in detail and you will have to give your written consent to be in the study.

All patients in this study will have bone marrow aspiration from the hip and from the upper arm during surgery. The first 15 participants will have bone marrow aspirated from the hip while positioned on the back on the operating table and deep humerus during the surgery positioned on the

## Comparison of Bone Marrow Aspiration from the Posterior Superior Iliac Spine and Deep Humeral Harvest in Patients Undergoing Rotator Cuff Repair

side. The final 15 participants will have bone marrow aspirated from the hip while positioned on the side on the operating table and deep humerus during the surgery while positioned on the side.

During your surgery, your surgeon will make a 1 cm cut into the skin on your hip bone and upper arm bone. A specialized needle that is able to go into the bone to get the bone marrow aspirate, which contains stem cells, will be put into the cuts on your skin. The bone marrow aspirate from both locations will be put into a special machine that separates the stem cells from the bone marrow aspirate.

Small samples of the bone marrow aspirate will be saved in tubes for laboratory analysis. The rest of the sample will be injected into your shoulder at the end of your surgery.

### **RISKS AND DISCOMFORTS:**

Standard sterile precautions for surgical procedures will be utilized for the rotator cuff repair surgery, but with any surgery there is risk of infection, bleeding, and swelling. There will also be a small (1 cm) incision to allow for a needle insertion hole into the upper arm and the hip bone for the bone marrow stem cell collection, which will be about the same size as an IV insertion. This may have some minor pain or swelling and there is a very minor risk of infection. Pain post procedure can occur but is usually self-limiting. Bruising may also occur.

There is a small risk of the disclosure of your protected health information, which will be minimized where possible including removing all identifiable information from data collection sheets and storing study information in secure locations as described in more detail below.

### **ALTERNATIVES:**

You do not have to participate in this study and can choose to have the recommended rotator cuff repair surgery performed without having bone marrow aspirate collected from your upper arm and hip.

### **BENEFITS:**

You may experience improved healing of your rotator cuff repair as a result of agreeing to participate in the study. You will receive at no extra charge stem cell augmentation of your rotator cuff repair. Future patients may benefit from the information obtained in this study.

### **CONFIDENTIALITY:**

All patient protected health information and other confidential information is protected by state and federal law, unless you allow it to be disclosed. During the course of this study, your information will be identified by a letter-number combination. Any new information that might develop during the course of the project will be provided to you if that information might affect your willingness to participate in the project. Pictures of you will be taken only if you sign below where it states: "I am willing to have photographs taken of the inside of my shoulder for use in presentations or publications."

## Comparison of Bone Marrow Aspiration from the Posterior Superior Iliac Spine and Deep Humeral Harvest in Patients Undergoing Rotator Cuff Repair

All information and data collected during this research will be recorded on the appropriate forms and stored in a locked room in the AREF research facility. In addition, all subject data forms, including

summary information and spreadsheets, will be scanned and stored in a secure password protected folder on a laptop that only the study investigators will have access to, and will be permanently deleted following publication of any and all manuscripts written as a result of this research. Records related to this study will be retained in a secure location for as long as required by applicable law, but no less than a period of 3 years after the completion of the study. At this time, all records will be properly destroyed.

### **HIPAA and PROTECTED HEALTH INFORMATION:**

We know that information about you and your health is private. We are dedicated to protecting the privacy of that information. Because of this promise, we must get your written authorization (permission) before we may use or disclose your protected health information, also called “PHI,” or share it with others for research purposes.

You can decide to sign or not to sign this authorization section. However, if you choose not to sign this authorization, you will not be able to take part in the research study. Whatever choice you make, about this research study will not have an effect on your access to medical care.

The United States government has issued a privacy rule to protect the privacy rights of patients (“Privacy Rule”). This rule was issued under a law called the Health Insurance Portability and Accountability Act of 1996 (HIPAA). The Privacy Rule is designed to protect the confidentiality of your health information. This section describes your rights and explains how your health information will be used and disclosed for this study.

During this study, the researchers will need to use personal health information about you. Your personal health information is health information about you that could be used to identify you because it includes information, such as your name, address, telephone number, photograph, date of birth, social security number, new and existing medical records, or the types, dates, and results of various tests and procedures. This may include information in your medical record and information created or collected during the study. By signing this consent, you are agreeing to allow the research personnel to use your personal health information to carry out this study.

By signing this document, you also allow the research staff to disclose your personal health information to outside entities who may be directly involved in completing the study project. The study data that the researchers send to these entities will not include your name, address, or social security number, but instead, will be designated with a code number. However, your medical records can be reviewed or copied at the study site by regulatory authorities or other oversight bodies, including the Baptist Hospital Institutional Review Board. The purpose of these reviews is to make sure the study is being conducted properly and that the data is being collected correctly, or for other purposes allowed by law.

## Comparison of Bone Marrow Aspiration from the Posterior Superior Iliac Spine and Deep Humeral Harvest in Patients Undergoing Rotator Cuff Repair

Your personal health information may no longer be protected by the Privacy Rule once it is disclosed, your personal health information will be kept as confidential as possible under the law; however, absolute confidentiality cannot be guaranteed.

If you cancel this authorization, the researchers will no longer use or disclose your personal health information under the authorization for this study, unless it is needed to preserve the scientific integrity of the study. Information obtained before you cancel this authorization may still be used by the researchers.

### **COST AND COMPENSATION:**

There will be no cost to you for participating and you will not receive any money for participating in this research. In the unlikely event of an emergency, the AREF will provide basic first aid medical treatment. However, if you were to require additional medical care as a result of participating in this study, you would need to contact your personal physician at your own expense.

The Investigators, the employers of the Investigators, and the Research Site does not have programs for compensating subjects for injury or complications related to human subjects' research. Any treatment will be at your expense.

### **VOLUNTARY PARTICIPATION/WITHDRAWAL:**

Taking part in this study is voluntary. Your medical treatment, costs of treatment and eligibility for benefits will not be affected if you decide not to sign this Consent Form or participate in the study. In the event new information becomes available that may affect your willingness to participate in this study, this information will be given to you so that you can make an informed decision about whether or not to continue your participation.

### **QUESTIONS:**

It is your right, as a research participant, to ask questions at any time regarding the procedures involved and any aspects of this study including the potential benefits or risks. For any questions you may have for the researcher, you may contact them at (850) 916-8590.

If you have questions about your rights as a research subject or if you have questions, concerns or complaints about the research, you may contact the Baptist Hospital Institutional Review Board\* at (850) 469-2227. The IRB will not be able to answer some types of questions, such as questions about appointment times.

\*The IRB is a group of individuals who independently review research

### **STATEMENT OF CONSENT TO PARTICIPATE IN THIS RESEARCH STUDY:**

By signing this consent form I agree to and acknowledge the following statements:

Comparison of Bone Marrow Aspiration from the Posterior Superior Iliac Spine and Deep Humeral Harvest in Patients Undergoing Rotator Cuff Repair

I agree to participate as a subject in this study and for my protected health information to be released as described in this consent.

I understand that my participation is completely voluntary, and that I may withdraw at any time without prejudice by sending a written request to the researcher at the Sports Medicine Research Lab, Andrews Research and Education Foundation, 1020 Gulf Breeze Pkwy, Gulf Breeze, FL 32561.

I have read and understand the above information and have been given the opportunity to discuss it and ask questions.

I understand that this authorization does not have an expiration date.

I have received a copy of this authorization form for my records.

I have been informed that I may contact the investigators by phone at (850) 916-8796 in order to answer any questions that I may have at any time during my participation.
