Project Title/PI: Incision Decision: A Prospective Randomized Trial Comparing Longitudinal vs. Transverse A1 Pulley Release Outcomes

Protocol ID: 202506034

Date: 3/31/26

IRB ID#: 202506034 | PI: Jason Strelzow, MD | PT ID# _____

Consent Documentation			
Consent Approval Date:		Consent Expiration Date:	

Participant's Name (print): _____

Research team member completing consent discussion with participant:

(only add people who are listed as "**yes**" to being involved in the consent process in myIRB):

- | | |
|--|--------------------------------------|
| <input type="checkbox"/> Jason Strelzow | <input type="checkbox"/> Ryan Calfee |
| <input type="checkbox"/> Rishikesh Sattaluri | <input type="checkbox"/> Nisha Kale |

Where did the consent discussion occur?

- ☐ In person ☐ Other, explain: _____

Documentation of consent conversation (check off to verify that each of the following items were completed):

- ☐ The informed consent was reviewed in its entirety with the participant and the following major points were reinforced:
- ☐ They may or may not receive any benefit from participating in this study, their participation is completely voluntary, and they may quit at any time.
 - ☐ The potential risks for participating include the possibility for pain or discomfort at the incision site, scar tissue causing pain or irritation when gripping, infection or wound opening, persistent or recurrent trigger finger symptoms, or the rare need for additional surgery. The risks are the same for both incision types and standard trigger finger surgery, whether or not participants are part of the study. There is also a risk of a breach of confidentiality and the potential to elevate negative feelings. Every effort will be made to keep their information confidential, minimize risk and provide them with services as needed.
 - ☐ Participation in this study includes screening for eligibility to participate in the study and randomization to either lengthwise or crosswise incision for their trigger finger surgery. Before surgery, participants will be asked about their health, finger condition, and to complete questionnaires about their finger function, pain, and mood. Participants will undergo their standard of care trigger finger surgery. After surgery, participants will be asked to complete a pain diary for the first 3 days. At 2 weeks post-surgery, participants will have an in-person clinic visit. A 6-week post-surgery visit will be conducted virtually. The 12-week visit may be conducted either virtually or in-person. The study involves about 5-6 hours total over 12 weeks, including visits and questionnaires.
 - ☐ They will not be paid for participating
 - ☐ They can take all the time needed to consider participation.

Did the participant have any questions regarding the study or the consent document? ☐ Yes ☐ No

(If yes, summarize below):

Summary of conversation:

**IRB ID#:****202506034****PI:****Jason Strelzow, MD****PT ID#****Consent Permissions:**

The participant provided consent permissions for the following optional study items:	Initials
Permission for Future Use of Data	<input type="checkbox"/> Yes <input type="checkbox"/> No
Permission to email PHI (Only if yes—Email address: _____)	<input type="checkbox"/> Yes <input type="checkbox"/> No
Permission to text PHI (Only if yes—Phone number: _____)	<input type="checkbox"/> Yes <input type="checkbox"/> No

Did the participant consent to participate in the study?

- ☐ Yes, the participant agreed and provided written consent to participate in the research study
- ☐ No, the participant declined participation and they were thanked for their time and consideration.

END Date & time of consent discussion:/ /
MM/DD/YYYY

:

HH:MM

☐ am ☐ pm

- ☐ By signing and dating below I am confirming that all of the above information is correct and is an accurate account of the informed consent discussion, the consent was reviewed in its entirety, adequate time was given for participation consideration and that the participant confirmed their willingness to participate in the research study.

3. Patients refusing consent

Source (*check all that apply*):☐ Verified with participant☐ Verified in EPIC, clinician assessment dated

____/____/____ (add assessment to research record)

☐ Other: _____**Eligibility Confirmation**

Eligible subjects must have all inclusion criteria marked "**Yes**" and all exclusion criteria marked "**No**".

Please check one:

☐ I verify that this subject **meets** all criteria required for enrollment and does not have, in my opinion, any findings or factors that may negatively impact compliance or the subject's safety by participation in this study.

☐ I verify that this subject **does not meet** all criteria required for study enrollment. This subject is considered a screen failure. **The reason for exclusion is summarized below.**

Procedure Checklist

Instructions: Insert all study procedures to be completed at this visit.

Mark off each procedure completed during the visit. If any procedures or assessments are missed/not completed, indicate reason for incompleteness in the comments section to the right of the assessment.

Add all supporting documentation to the subject's research record.
