

**Title:** A Study of Mobile Medical Supportive Care Program for Family Caregivers  
With Dementia Combined With Diabetes

**Identifiers:** NCT06785857    **Unique Protocol ID:** K2021-05-024

**Date:** 2021-5-1

## **Informed Consent**

Dear uncle/aunt:

Greetings!

I am a graduate student of the School of Nursing, Fujian Medical University, and I am currently working on the project “ Development and application of nursing intervention technology system for cognitive impairment in the elderly ” . The main purpose of this study is to explore whether effective supportive care can effectively improve the burden of care of dementia combined with diabetes mellitus caregivers. You are invited to take part in this study, which will last 12 weeks. If you are willing to participate, you will be assessed for caregiving burden.

SPECIAL NOTE: We guarantee that all information about your participation in the study is confidential and that this investigation will not cause any harm to you or your family. Therefore, the evaluation and examination are provided free of charge, and you are free to choose to participate or decline this study, and also have the right to withdraw from this study at any time.

If you are aware of the above information, please sign the Informed Consent section. Again, thank you very much for your support and cooperation!
