Subtitle: Voluntary Participation Form

Informed Consent Form for Voluntary Participation in the Study

This research is being conducted by PhD student Emine Tuğba Yorulmaz from Istanbul University-Cerrahpaşa, Department of Medical Nursing, under the supervision of Asst. Prof. Arzu Erkoç, as part of her doctoral dissertation.

Purpose of the Study:

To determine the effect of fan therapy in the management of ticagrelor-associated dyspnea.

Procedures:

Complete forms and use a handheld fan toward your face three times a day for 1–3 days as instructed.

Study lasts ~2 days. Study will terminate if severe shortness of breath occurs.

Confidentiality:

Participation is voluntary. No identifying info collected. Data analyzed collectively for research publications.

Rights:

You can withdraw anytime without consequences. Inform study personnel if you choose to withdraw.

Contacts:

Faculty Member: Arzu Erkoç, Dept. Nursing, Email: arzu.erkoc@iuc.edu.tr

PhD student: Emine Tuğba Yorulmaz, Email: emine.yorulmaz@acibadem.edu.tr

Consent Statement:

I have read the above and voluntarily agree to participate.
