RE: Circa/EGD Study Statistical Analysis Plan

To whom it may concern:

The SAP for this study protocol is attached (see below).

Sincerely,

A handwritten signature in black ink that reads "Gregory K. Feld". The signature is written in a cursive, flowing style.

Gregory Feld, MD

For the study population statistical analyses were performed in the following manner:

1. Continuous variables will be expressed as the mean \pm one standard deviation, and statistical analysis for any significant difference will be calculated using the Student's t-test.
2. All categorical variables will be expressed as absolute numbers or percentages, and statistical significance for any significant differences will be calculated using the Chisquared test.
3. A statistically significant difference between variables will require a p value ≤ 0.05 .
4. All statistical analyses will be performed using Microsoft Excel 2010.
