

## RESEARCH PROTOCOL

### Official Title:

**THE EFFECT OF A PATIENT EDUCATION PROGRAM ON VITAMIN D LEVELS AND HEALTH BELIEFS REGARDING VITAMIN D USE**

### Brief Title:

'The effect of a patient education program on vitamin D levels and health beliefs regarding vitamin D use'

**Principal Investigator:** Asst. Prof. Özge ÜÇÜNCÜ KTU Faculty of Medicine, Department of Internal Medicine, Division of Endocrinology and Metabolism

### Research Team:

- Prof. Dr. Mustafa KOÇAK (Methodology & Coordination)
- Asst. Prof. Özge ÜÇÜNCÜ (Methodology & Writing)
- Asst. Prof. Mefküre DURMUŞ (Methodology & Data Analysis)
- Res. Asst. Pharm. Sena USTAÖMER (Methodology & Data Collection)

### Institutions:

- Karadeniz Technical University (KTU) Faculty of Medicine
- Karadeniz Technical University (KTU) Faculty of Pharmacy

**Date of Protocol:** April 2026

**Study Status:** Academic Research / Prospective

- **NCT Number:** Not yet.
- **Protocol Number:** [2025/257]
- **Ethics Committee Approval Number:** [2025/257]
- **Ethics Committee Name:** Karadeniz Technical University, Faculty of Medicine, Scientific Research Ethics Committee

# 1. General Description of the Research/Thesis

**1. a. Title of the Research/Thesis:** The Effect of a Patient Education Program on Vitamin D Levels and Health Beliefs Regarding Vitamin D Use

**1. b. Principal Investigator:** Asst. Prof. Özge ÜÇÜNCÜ

**1. c. Research Team:**

1. Prof. Dr. Mustafa KOÇAK / KTU Faculty of Medicine / Dept. of Internal Medicine / Division of Endocrinology and Metabolism
2. Asst. Prof. Özge ÜÇÜNCÜ / KTU Faculty of Medicine / Dept. of Internal Medicine / Division of Endocrinology and Metabolism
3. Asst. Prof. Mefkûre DURMUŞ / KTU Faculty of Pharmacy / Dept. of Clinical Pharmacy
4. Res. Asst. Pharm. Sena USTAÖMER / KTU Faculty of Pharmacy / Dept. of Clinical Pharmacy

**1. d. Nature of the Study:**

- **d.1:** Prospective
- **d.2:** Interventional
- **d.3:** Analytical Research (Randomised Controlled Trial)

**1. e. Status of the Research:** Academic Research

**1. f. Multi-center Status:** The research is a single-center study

**1. g. Informed Consent:** Informed Volunteer Consent Form (IVCF) is attached

**1. h. Declaration:** The study processes will be conducted in accordance with the principles of the Declaration of Helsinki and Good Clinical Practice (GCP) guidelines

**1.i. Academic Contributions of the Team:**

- Prof. Dr. Mustafa KOÇAK: Methodology, coordination
- Asst. Prof. Özge ÜÇÜNCÜ: Methodology, writing, and proofreading
- Asst. Prof. Mefkûre DURMUŞ: Methodology, data analysis, writing, and proofreading
- Res. Asst. Pharm. Sena USTAÖMER: Methodology, data collection, data analysis, writing, and proofreading

## 2. Technical Information Regarding the Research

**2. a. Aim and Hypotheses:**

- **Aim:** To evaluate treatment adherence in individuals with Vitamin D levels < 30 ng/mL, identify adherence problems, and determine the role of patient education services in resolving these issues.

- **Hypothesis:** Patient education services increase adherence to Vitamin D treatment and result in a statistically significant difference in achieving the target serum 25(OH) vitamin D range (30-50 ng/mL) at the end of 6 months.

**2. b. Scientific Contribution:** The study addresses gaps in the literature where patient monitoring services are insufficient and online surveys often lead to selection bias. Unlike traditional methods, this study uses a randomized controlled design, providing structured face-to-face education, informative brochures, and monthly follow-up calls to assess adherence and Vitamin D levels.

**2. c. Literature Background:** Vitamin D deficiency is a global public health issue affecting nearly 1 billion people. This study builds on findings that pharmacist/health professional counseling can significantly improve patient knowledge scores and increase serum Vitamin D levels (e.g., 7-10 ng/mL increase over 12 weeks).

**2. d. Study Location and Permissions:** The study will be conducted at the KTU Faculty of Medicine, Division of Endocrinology and Metabolism. Permissions from the Division and the Chief Physician of Farabi Hospital are obtained.

**2. e. Methodology:**

- **Study Design:** Randomized controlled prospective study.
- **Inclusion Criteria:** Female patients aged 18 and over, Vitamin D levels < 30 ng/mL, providing written consent.
- **Exclusion Criteria:** Males, under 18, those not providing consent, Vitamin D levels > 30 ng/mL, and patients who have undergone gastric bypass or bariatric surgery.
- **Sample Size:** Based on an effect size of 0.25 and 90% power, a minimum of 58 patients (29 per group) will be included, accounting for a 25% dropout rate.
- **Parameters to be Monitored:** Vitamin D Health Belief Scale scores, Serum 25(OH) Vitamin D, PTH, Calcium, Albumin levels, and Medication Possession Ratio (MPR) percentages.
- **Statistical Analysis:** SPSS 23.0 will be used. Normal distributions will be analyzed with Paired t-tests, and non-normal distributions with Wilcoxon signed-rank tests. ANCOVA will be used to evaluate variables like age and MPR on Vitamin D changes.

**2. f. Research Schedule:**

1. **Ethical Approval:** Sept 2025 - Oct 2025
2. **Patient Enrollment & Initial Scale Application:** Oct 2025 - April 2026
3. **Education Intervention:** Oct 2025 - April 2026
4. **Post-Education Evaluation (Monthly MPR & 6th Month Scale):** April 2026 - Oct 2026
5. **Data Analysis & Finalization:** Oct 2026 - Nov 2026

**2. g. Budget:** No budget is required for the materials used in the research process.
