Grant Number: R01AA026596
Funded by: NIAAA
Date Approved: 24 September 2024

Women's eHealth Study

UPDATED SCREENER SHEET LANGUAGE (2nd screen after clicking survey link)

Women's eHealth Study

Thank you for your interest in the Women's eHealth Study. It is being led by Dr. Steven Ondersma of Michigan State University's Charles Stewart Mott Department of Public Health. We would like to ask you a few screening questions to find out if you may be eligible for the research study. Before you begin the screening, we would like to tell you a little bit about the research.

The Women's eHealth Study is evaluating software to improve women's health. If you're eligible, you'll be able to decide if you'd like to voluntarily participate in the study. Answering the screening questions is also voluntary. If you are eligible for the study and choose to participate, it would involve answering surveys online, watching short videos, and possibly receiving text messages twice a week for up to seven months. You would be compensated up to $170 for your participation.

Today's eligibility questions will take about 10 minutes. We will ask you to provide some general information about yourself, such as your age and state of residence. We will also ask questions about your physical health, mood, and health-related habits, such as exercise, sleeping, smoking, and drinking. You do not have to answer any questions you do not wish to answer or are uncomfortable answering, and you may stop at any time. Your participation in this screening is voluntary.

Your answers will be anonymous unless you qualify for the study and agree to give us your name and contact information. If you qualify for the research and provide your contact information, your answers will be connected to your name and kept with your research record. All records are confidential and only accessible by study staff.

If you are willing to take this eligibility survey, please click "I agree" to continue. Your completion of this survey is your agreement to participate in this screening process.
