REACH West Study
Student Assent Form

What Is REACH West?
REACH West (**R**egional **E**fforts to **A**dvance school-based sun safety through **C**ollaboration for skin **H**ealth) is a research study conducted by Huntsman Cancer Institute. The goal of the study is to evaluate a school-based sun safety education program for high school students.

What Is the Purpose of This Study?
The purpose of this study is to learn whether a school-based skin cancer education program can improve students' knowledge about skin cancer and encourage healthy sun protection behaviors. What we learn may help improve future skin cancer prevention programs for high school students in the mountain west and beyond.

Why Am I Invited to Participate?
You and your parent(s) are being invited because you are enrolled in a participating high school.

What Will I Do?
If you enroll in the study, over about 3 months, **you will**:

- Participate in a skin cancer education program during regular class time.
- Complete three 15-minute surveys before, immediately after, and one month after the educational program.
- Some students may be invited to participate in a remote interview (up to 30 minutes) to provide feedback about the program.

What Will My Parent(s) Do?
If you enroll in the study, **your parent may** be invited to participate in a 30-minute virtual interview about their observations of your participation in the educational program. This interview may take place separately from or together with you.

What Does the Educational Program Include?
The program includes information and activities related to skin cancer and ways to prevent it, skin cancer risk factors, brief knowledge quizzes, and educational activities.

Study Communication
Study staff may contact you or your parents by text message, phone call, or email. By taking part in this study, you agree with these communication methods.

University of Utah
Institutional Review Board
Exemption 8/17/2026

IRB_00203568

Risks and Benefits

Risks: The risks of participating are minimal. There is a small risk of loss of confidentiality and privacy. You and your parents may feel uncomfortable answering survey and interview questions and/or learning about skin cancer topics.

Benefits: You and your parents may learn more about skin cancer prevention and healthy sun protection behaviors. The information collected may help improve future educational programs.

Privacy and Confidentiality

We will ask for you and your parents' personal information, such as your gender and contact details. To protect your information, study information will be stored on secure University of Utah and Huntsman Cancer Institute systems, including REDCap and UBox.

Canvas, or an equivalent learning management system, will be used to collect your study metrics (e.g. completion of activities, time spent on modules, etc.). Teachers will have access to educational activities through Canvas as part of normal classroom instruction.

Only authorized study personnel will have access to identifiable information collected from surveys and interviews.

Interview recordings could be temporarily stored on Zoom's cloud network for the purposes of transcribing interviews. To protect your privacy in the Zoom network, recordings and transcripts will be deleted after they are downloaded from their network. Recordings will be destroyed after the study is complete.

Your name or any other identifying information will not appear in any reports or publications.

Voluntary Participation

Taking part is completely voluntary. Choosing not to participate, or withdrawing later, will not affect your grades, school standing, or relationship with your teacher or school.

- You and your parents may skip any questions.
- You and your parents may stop the surveys or interview at any time.
- You and your parents may withdraw from the study at any time without penalty.

To withdraw, you may email the principal investigator at Yelena.Wu@hci.utah.edu, contact the research team, or tell your teacher, who can notify the research team.

If you withdraw, we will not collect new information from you. However, we may still use information already collected to protect the quality of the research.

University of Utah
Institutional Review Board
Exemption 8/17/2026

Teacher Consent Form

REACH West Study
Teacher Consent Form

What Is REACH West?
REACH West (**R**egional **E**fforts to **A**dvance school-based sun safety through **C**ollaboration for skin **H**ealth) is a research study conducted by Huntsman Cancer Institute. The goal of the study is to evaluate a school-based sun safety education program for high school students.

What Is the Purpose of This Study?
The purpose of this study is to learn whether a school-based skin cancer education program can improve students' knowledge about skin cancer and encourage healthy sun protection behaviors. What we learn may help improve future skin cancer prevention programs for high school students in the mountain west and beyond.

Why Am I Invited to Participate?
You are invited to participate because you are a teacher in Montana, Idaho, Nevada, or Wyoming.

What Will I Do?
Over about 3 months, you will be asked to:

- Share information about the study with parents and students
- Teach the skin cancer prevention course we provide
- Take a 15-minute survey and participate in an interview to provide feedback
- Support follow-up with students for survey completion after the course (e.g. school visits, email blasts)

What Will My Students Do?
If you enroll in the study, over about 3 months, **they will**:

- Participate in a skin cancer education program during regular class time.
- Complete three 15-minute surveys before, immediately after, and one month after the educational program.
- Some students may be invited to participate in a remote interview (up to 30 minutes) to provide feedback about the program (outside of the school day).

What Will Parents Do?
They **may** be invited to participate in a 30-minute virtual interview about their observations of their child's participation in the educational program.

University of Utah
Institutional Review Board
Exemption 8/17/2026

IRB_00203568

What Does the Educational Program Include?

The program includes information and activities related to skin cancer and ways to prevent it, skin cancer risk factors, brief knowledge quizzes, and educational activities.

Compensation

You will receive a $25 gift card for completing the survey, $30 for participating in an interview, and $200 for teaching the course and supporting survey administration.

Because you will be paid for taking part in this study, we will need to collect your Social Security Number using a Federal W-9 form. Payments you receive may be reported as taxable income to the Internal Revenue Service (IRS). You can choose not to provide your Social Security Number and still take part in the study, but you will not be able to receive payment as we've described.

Study Communication

Study staff may contact you by text message, phone call, or email. By taking part in this study, you agree with these communication methods.

Risks and Benefits

Risks: The risks of participating are minimal. There is a small risk of loss of confidentiality and privacy. You may feel uncomfortable answering survey and interview questions and/or learning about skin cancer topics.

Benefits: You may learn more about skin cancer prevention and healthy sun protection behaviors. The information collected may help improve future educational programs.

Privacy and Confidentiality

We will ask for your personal information, such as your gender and contact details. To protect your information, study information will be stored on secure University of Utah and Huntsman Cancer Institute systems, including REDCap and UBox.

Canvas, or an equivalent learning management system, will be used to collect you and your students' study metrics (e.g. completion of activities, time spent on modules, etc.).

Only authorized study personnel will have access to identifiable information collected from surveys and interviews.

Interview recordings could be temporarily stored on Zoom's cloud network for the purposes of transcribing interviews. To protect your privacy in the Zoom network, recordings and transcripts will be deleted after they are downloaded from their network. Recordings will be destroyed after the study is complete.
