

## **Cover Page for Statistical Analysis Plan**

Sponsor-Investigator:	Spyridon Fortis
NCT Number:	NCT03959982
Unique Protocol ID:	201905817
Official Title:	The Effect of Heated, Humidified High-flow Air in COPD Patients With Chronic Bronchitis
Date of Document:	01 July 2019

Assessment of the effectiveness of the intervention by assessing the change in the PSQI, CAT, and the 6-minute walk from enrollment to the 6-week visit. The Wilcoxon rank-sum test will be used to compare changes in PSQI, CAT, and the 6-minute walk test from enrollment to the 6-week visit between the intervention and the control group. The Wilcoxon rank-sum test will be used because the dependent variables will most likely not follow normal distribution.
