

## Cover Page for Data Security Plan

Sponsor Name	Northwestern University
NCT ID	NCT02357784
Sponsor Trial ID	STU00098840
Official Title of the study	Sacral Neuromodulation in Dual Incontinence: Ultrasound and Afferent Nerve Sensation Assessment (SaNDI)
Document Date	2-8-2023

Each sensory modality threshold as determined at each of the different anatomic sites will be evaluated separately. Sensory thresholds will be compared before and after SNM placement using paired t-test. Multivariate regression models will be used to determine clinical and neurophysiologic predictors of symptom improvement. Urethral sphincter volumes and presence/absence and size of internal and external anal sphincter defects will be compared in responders and non-responders.
