

The Ohio State University Consent to Participate in Research

Study Title: Using the Rehabilitation Treatment Specification System (RTSS) to Maximize Rehabilitation Research Impact: A Video-Based Observational Study

Principal Investigator: Lauren Wengerd, PhD, MS, OTR/L

Sponsor: American Occupational Therapy Foundation (AOTF)

- **This is a consent form for research participation.** It contains important information about this study and what to expect if you decide to participate. Please consider the information carefully. Feel free to discuss the study with your friends and family and to ask questions before making your decision whether or not to participate.
- **Your participation is voluntary.** You may refuse to participate in this study. If you decide to take part in the study, you may leave the study at any time. No matter what decision you make, there will be no penalty to you and you will not lose any of your usual benefits. Your decision will not affect your future relationship with The Ohio State University. If you are a student or employee at Ohio State, your decision will not affect your grades or employment status.
- **You may or may not benefit as a result of participating in this study.** Also, as explained below, your participation may result in unintended or harmful effects for you that may be minor or may be serious depending on the nature of the research.
- **You will be provided with any new information that develops during the study that may affect your decision whether or not to continue to participate.** If you decide to participate, you will be asked to sign this form and will receive a copy of the form. You are being asked to consider participating in this study for the reasons explained below.

Key Information About This Study

The following is a short summary to help you decide whether or not to be a part of this study. More detailed information is listed later in this form.

The purpose of this study is to better understand the types of treatment activities occupational therapists use to treat adult stroke and spinal cord injury survivors with arm or hand weakness. This study will help us identify current gaps in rehabilitation and better inform future research.

1. Why is this study being done?

The purpose of this study is to better understand the types of treatment activities occupational

34 therapists use to treat adult stroke and spinal cord injury survivors with arm or hand weakness.
35 This is important because researchers need to know what is being done in rehabilitation clinics
36 to improve rehabilitation research. The results of this study will be used in future stroke and
37 spinal cord injury rehabilitation research studies.

38

39 **2. How many people will take part in this study?**

40 We plan to enroll up to 90 participants in this study. We will enroll up to 45 adult stroke
41 survivors and up to 30 adult cervical spinal cord injury survivors receiving outpatient
42 occupational therapy services at an Ohio State University clinic. We will also enroll up to 15
43 occupational therapy practitioners (occupational therapists or occupational therapy assistants).

44

45 **3. What will happen if I take part in this study?**

46 If you choose to take part in this study, we will ask that you notify patients on your
47 caseload who have upper extremity sensorimotor impairment as a result of a stroke or
48 cervical spinal cord injury about this study. A member of our study team will provide
49 them additional study information and obtain informed consent from them if they are
50 interested in participating. Once both you and the patient participant have provided
51 written consent, we will schedule video recordings around your patient's regularly
52 scheduled treatment sessions. We will confirm with you prior to recording a session
53 that you are okay with being recorded, and that the session is appropriate for our study
54 (e.g., more than 50% of the session will focus on functional or sensorimotor
55 impairments related to their stroke or spinal cord injury). A member of our study team
56 will setup the video camera in the least intrusive way possible for your session and will
57 start/stop the recording. Once we are done collecting video recordings from your
58 sessions, we will ask that you complete a brief electronic survey (~10 minutes) about
59 your experience in the study to help us prepare for future video observation work.

60

61 **4. How long will I be in the study?**

62 You will be enrolled in this study until you will have a maximum of 30 sessions recorded, we
63 have reached our overall video recording target across all therapists enrolled of 90 stroke
64 session recordings and 60 spinal cord injury recordings, or until June 30th, 2026 (end of grant
65 period), whichever comes first. We anticipate that you will be enrolled for approximately
66 six months, though this may vary based on your caseload and number of sessions
67 recorded per week. We will make our best effort to evenly distribute video recordings across
68 all therapists enrolled, however, this may vary based on the number of SCI and stroke patients
69 seen by each therapist, number of therapists at each clinic location, etc. The time commitment
70 can be up to approximately 33.25 hours including consent, enrollment, demographics,
71 passively being video recorded, and post-recording feasibility survey (as outlined next).
72 Informed Consent, Enrollment, and Demographics may take 30-60 minutes per participant.
73 Time spent assisting with recruitment of patient participants may take up to 2 hours per OT

74 practitioner (recruitment will include verbally informing their current patients about the study
75 and engaging a member of our study team, so this will take ~5 minutes per participant, up to a
76 max of approximately 2 hours). Video Recording may take approximately 1-30 hours being
77 passively video recorded (most sessions are 45-60 minutes long and each OT participant will
78 have a max. of 30 sessions recorded, but this will vary significantly based on the number of
79 SCI and stroke patients seen by each therapist). Post-Video Recording Survey for
80 Feasibility/Acceptability may take approximately 15 minutes. No more than 30 treatment
81 sessions per OT practitioner participant will be recorded to increase the representativeness of
82 our sample.

83

84 **5. Can I stop being in the study?**

85

86 You may leave the study at any time. If you decide to stop participating in the study,
87 there will be no penalty to you, and you will not lose any benefits to which you are
88 otherwise entitled. Your decision will not affect your future relationship with The Ohio
89 State University.

90

91 **6. What risks, side effects or discomforts can I expect from being in the study?**

92 There are minimal risks to participating in this study. While this study involves minimal
93 physical risks, there is a potential risk of a data breach involving the information you provide.
94 To minimize this risk, we will take several precautions to ensure the security and confidentiality
95 of your data. All electronic data will be stored on secure, password-protected servers behind
96 institutional firewalls, and any identifying information will be de-identified or coded whenever
97 possible. All names and identifiers will be removed when data is reported. Your video
98 recordings may be used for educational or research purposes. If this happens, identifying
99 features such as your face will be blurred/blocked to maintain your confidentiality. In the
100 event that we wish to use video recordings without blurring/blocking your face, we will obtain
101 additional explicit written permission from you to do so. Despite these precautions, there is a
102 small chance that a data breach could occur. In the unlikely event of a breach, we will follow
103 university policies and promptly notify you as required by applicable laws and regulations.

104

105 **7. What benefits can I expect from being in the study?**

106

107 The results of this study will be used to inform future stroke and spinal cord injury
108 rehabilitation research. You will not benefit directly from participating in this study.

109

110 **8. What other choices do I have if I do not take part in the study?**

111

112 You may choose not to participate without penalty or loss of benefits to which you are
113 otherwise entitled.

114

115 **9. Will my study-related information be kept confidential?**

116

117 Efforts will be made to keep your study-related information confidential. However, there
118 may be circumstances where this information must be released. For example, personal
119 information regarding your participation in this study may be disclosed if required by law.
120 Because we are using the Internet, there is a chance that someone could access your online
121 responses without permission. In some cases, this information could be used to identify
122 you.

123

124 Also, your records may be reviewed by the following groups (as applicable to the
125 research):

- 126 • Office for Human Research Protections or other federal, state, or international
127 regulatory agencies;
- 128 • U.S. Food and Drug Administration;
- 129 • The Ohio State University Institutional Review Board or Office of Responsible
130 Research Practices;
- 131 • Authorized Ohio State University staff not involved in the study may be aware that
132 you are participating in a research study and have access to your information;
- 133 • The sponsor supporting the study, their agents or study monitors; and
- 134 • Your insurance company (if charges are billed to insurance).
- 135 • Other: American Occupational Therapy Foundation (funding sponsor)

136

137 If this study is related to your medical care, your study-related information may be placed
138 in your permanent hospital, clinic, or physician's office records. Authorized Ohio State
139 University staff not involved in the study may be aware that you are participating in a
140 research study and have access to your information.

141

142 Video recordings will be uploaded and stored in a secure electronic repository behind The
143 Ohio State University Medical Center firewall. Your data will be protected with a code to
144 reduce the risk that other people can view the responses. Your video recordings may be
145 used for educational and/or research purposes. In such cases, we will blur or block your
146 face to maintain confidentiality. In the event that we wish to use video recordings without
147 blurring/blocking your face, we will obtain additional explicit written permission from you
148 to do so. If you do not want to be video recorded or you do not want your de-identified
149 video recordings used for educational or research purposes, do not participate in this study.

150

151 **10. Will my de-identified information (and bio-specimens) be used or shared for
152 future research?**

153

154 Yes, it/they may be used or shared with other researchers without your additional

155 informed consent.

156

157 **11. What are the costs of taking part in this study?**

158

159 There are no costs to you to take part in this study.

160

161 **12. Will I be paid for taking part in this study?**

162

163 You will be paid \$25 for each video recording we collect of their treatment sessions, up to a
164 maximum of \$750 (30 recordings/therapist maximum). Payment will be made via a Greenphire
165 ClinCard, a reloadable prepaid debit card, following university policies. In accordance with
166 university policy, any incentives provided to participants as part of this study will be managed in
167 compliance with applicable regulations regarding taxable income. If required, the university will
168 report incentive payments to the appropriate tax authorities.

169

170 **13. What happens if I am injured because I took part in this study?**

171

172 If you suffer an injury from participating in this study, you should notify the researcher or
173 study doctor immediately, who will determine if you should obtain medical treatment at
174 The Ohio State University Wexner Medical Center.

175

176 The cost for this treatment will be billed to you or your medical or hospital insurance. The
177 Ohio State University has no funds set aside for the payment of health care expenses for
178 this study.

179

180 **14. What are my rights if I take part in this study?**

181

182 If you choose to participate in the study, you may discontinue participation at any time
183 without penalty or loss of benefits. By signing this form, you do not give up any personal
184 legal rights you may have as a participant in this study.

185

186 You will be provided with any new information that develops during the course of the
187 research that may affect your decision whether or not to continue participation in the
188 study.

189

190 You may refuse to participate in this study without penalty or loss of benefits to which
191 you are otherwise entitled.

192

193 An Institutional Review Board responsible for human subjects research at The Ohio State
194 University reviewed this research project and found it to be acceptable, according to

195 applicable state and federal regulations and University policies designed to protect the
196 rights and welfare of research participants.

197

198 **15. Who can answer my questions about the study?**

199

200 For study questions, concerns, or complaints, or if you feel you have been harmed as a
201 result of study participation, you may contact Dr. Lauren Wengerd (call/text: 330-464-
202 9171; lauren.wengerd@osumc.edu).

203 For questions about your rights as a participant in this study or to discuss other study-related
204 concerns or complaints with someone who is not part of the research team, you may contact
205 the Ohio State Office of Responsible Research Practices at 1-800-678-6251. If you are
206 injured as a result of participating in this study or for questions about a study-related injury,
207 you may contact Dr. Lauren Wengerd (call/text: 330-464-9171; lauren.wengerd@osumc.edu).
208

209
210
211

212 **Signing the consent form**

213
214 I have read (or someone has read to me) this form and I am aware that I am being asked to
215 participate in a research study. I have had the opportunity to ask questions and have had them
216 answered to my satisfaction. I voluntarily agree to participate in this study.

217
218 I am not giving up any legal rights by signing this form. I will be given a copy of this form.
219

Printed name of participant	Signature of participant	
		AM/PM
	Date and time	

Printed name of person authorized to consent for participant (when applicable)	Signature of person authorized to consent for participant (when applicable)	
		AM/PM
