International Tracking Neurodegeneration in Early Wolfram Syndrome
NCT Number NCT03951298
Unique Protocol Id 201808060
May 8 2026

Analyses are described for the primary outcome measures. Longitudinal analyses, using repeated measures general linear models will be used to examine the impact of time on pons volumes and WURS Physical Severity score within the Wolfram group. Significance is set at $p<.05$ for a main effect of time (both measures) and a group x time interaction (pons volume).
